Riverfrut®

*Traditionally close
to land*

WE PRODUCE, PROCESS AND MARKET FRESH HORTICULTURAL PRODUCE IN THE PROVINCE OF PIACENZA, WITH A FOCUS ON NEW TRENDS IN FOOD.

The Società Agricola Riverfrut has been active in the Piacenza area for over 50 years.

The brainchild of brothers Emilio and Angelo Bertuzzi, whose family had been farming for generations, we started growing vegetables in the early 1980s, particularly tomatoes and French beans.

In 2000 we added to our traditional activity (**fresh vegetables**) the production of pre-cooked (**grilled and steamed**) ready-to-eat

vegetables and, later, **vegetarian burgers** and **vegetable purées**, always with an eye to both tradition and the new food trends of recent years.

In the green countryside around Piacenza in Emilia-Romagna, a region renowned for its agricultural production and good food, we found the perfect land for carrying out our activities.

The **controlled supply chain** and **state-of-the-art** facilities located at the centre of the farming activities have enabled us to have a **presence in many of the major supermarkets** and within the main Italian and foreign fruit and vegetable markets and also to become suppliers to **major food companies**.

We have always paid **particular attention to innovation and research** and we continue to place overall quality as our main objective and way of working.

*The dependability of
Riverfrut quality
originates from the land
and finds its place on
the table*

The **quality** of our products is seen in **all stages of production**, starting with the control and monitoring of the agronomic characteristics of the cultivated fields, through to the harvesting and processing of the vegetables and the distribution of the finished product.

The area under cultivation by the **supply chain** was about **800 ha** in 2020, most of **which** was devoted to **green beans and tomatoes**, plus cauliflower, broccoli and courgettes.

In order to increase market loyalty, we voluntarily adhere to **specific integrated production regulations** issued by the **Emilia-Romagna region**, the strict observance of which is verified by qualified inspectors who carry out **planned and systematic checks** on both the production processes and the products, which can, as a result, bear the **QC MARK (Controlled Quality)**.

Certifications

DTP 107 - "Vegetarian Quality" and "Vegan Vegetarian Quality"

Our Vegetable Burgers and Purées have obtained national certification for vegetarian and vegan products.

CSQA - For French Beans and the Supply Chain

DTP021: French beans grown in accordance with the integrated control criteria with pesticide residues lower than the maximum permitted levels. "Zero Residue". DTP035: Controlled agri-food chain.

STEAMED AND GRILLED PRODUCTS

Our pre-cooked range

Steamed or grilled products

Our pre-cooked range

We process the vegetables into our **range of pre-cooked products** and market them under our **Cottintavola brand**. A feature of our pre-cooked range is the **total absence of additives or preservatives**; the special production process ensures a long shelf life, retaining the characteristics and properties of the fresh vegetable.

The skin pack of the **steamed** and **grilled** products makes the contents fully visible and is completely microwaveable.

Weight: 200 gr
(2x100 gr)

A top-down view of a rustic green ceramic bowl filled with creamy, light-yellow mashed potatoes. The bowl sits on a dark, textured wooden surface. Several whole, unpeeled yellow potatoes are scattered around the bowl, some resting on a piece of light-colored burlap fabric in the upper left corner. The lighting is soft, highlighting the texture of the potatoes and the wood.

Organic

ORGANIC PURÉES

VEGETABLE PURÉES

Industry Line

Riverfrut®

Industry Line

Riverfrut processes different types of vegetables into **vegetable purees**, using state-of-the-art technology that maintains all the organoleptic properties of the product.

The raw material is carefully selected, cleaned and washed; **processing into purées and packaging** is carried out using **aseptic technology** in a very short time in order to retain the product's original quality colour and flavour. Potatoes, artichokes, pumpkins, asparagus, carrots, peppers, broccoli, green beans and spinach are processed with very small batch sizes, thanks to the highly flexible plant.

The food industry uses Riverfrut vegetable purées as a **basic ingredient for fillings** or as a **natural colouring agent**, since they contain **no preservatives** or added ingredients. The vegetable purées are packaged in aseptic bags-in-boxes in 3 kg, 10 kg and 200 kg sizes, guaranteeing a shelf life of 24 months from the date of production when stored at room temperature.
